

## **Digital World Information Sheet**

Please watch the pre-recorded Assembly video on Our Relationship with the Digital World. It is 15 mins long and afterwards I would request that you watch the following video. How to avoid scams. Using the link below.

<https://www.youtube.com/watch?v=bVYonljRFAQ>

Some questions for you to answer. Do a bit of research online or ask your Parents/Carers.

1. What is a scam?
2. Are young people targets for scammers?
3. Do you understand what Amber means when she talks about click bait?
4. Do you use privacy controls on your internet devices?
5. What is a strong password and how strong are the passwords that you use?
6. What anti-virus do you have installed? You can download free versions.
7. Do you understand the danger of clicking on suspicious links on e mails.

When you are able, I would request that you complete the Internet Safety quiz.

If you have any questions about the power point or the quiz that you would like cleared up, then please forward them to your teacher who can bring them to my notice. I will then do my best to answer on another specific pre-recorded reply. I hope you do have some questions.

Thank you.
